

Belt Name:
LS 1000

Technical Data

Color	Blue
Compound	High Strength Stable Polyester
Plies	1
Fabric/Carcass	Polyester
Cover Surface	Bare
Bottom Surface	Bare
Mesh Opening	1mm x 1mm
Mesh Width	1000μ
Overall Gauge	.055"
Temp Range °F	0° F to 190° F
Food Approved	Yes
Anti-Static	No
Recommended Splice	Laced

Features/Benefits:

Filter belts are used in a combination of screening/filter/drying and conveying applications. The base material consists of single-ply, woven monofilament polyester in different thickness' and mesh widths. The material is equipped with PVC reinforcement strips in the longitudinal and transverse directions to add body and strength. V-Guides, Sidewalls, and cleats can be added into these reinforcement strips. LS 1000 is used for final washing applications involving only the finest of debris.
